

ENDOLINE® 2V - JECT

28

2 WAYS INJECTION NEEDLE

PLASTIC TIP

METAL TIP

The ENDOLINE® 2V-JECT 2-ways injection needle has been designed specifically and exclusively for haemostasis of gastrointestinal haemorrhages, sclerosis of oesophageal varices and inflating and marking polyps.

The needle is only suitable for use with flexible endoscopes.

The 2nd way can be used to clean cleaning and/or rinse the procedure area.

ADVANTAGES

- Radiopaque distal part visible on the screen, for models with a metal tip.
- Ergonomically shaped handle for easy manipulation.
- Product compatible for use with the main endoscopes on the market.
- Luer-Lock connector for connecting a syringe for product injection.

AVAILABLE HANDLES

1.0
The most widely used handle in the world, used and approved for over 20 years!

2.0
Evolution of the handle 1.0, thicker for a better grip in the hand.
